Environment Committee

Meeting Minutes

August 23, 2010 7:00 PM

Hidden Lake Clubhouse

8360 Sedan Ave., West Hills CA 91304

1. The meeting was called to order.
2. The minutes from the July 26th meeting were approved.
3. Cassandra Owens from the Regional Water Quality Control Board was introduced and she made a presentation concerning the surface water conditions and treatment at the Santa Susana Field Lab. The Board controls the remediation and discharge of the SSFL through a National Pollutant Discharge Elimination System (NPDES) permit. The Board oversees the identification of polluted streams coming from the SSFL and reviews the proposed cleanup, the construction of cleanup equipment and monitors the final discharge against their established standards. Cassandra then showed all of the outfalls and the associated cleanup equipment in place. In addition to these activities the Board monitors the removal of surface soil and that eliminates the source of the pollutants before they get into the discharges. Finally Cassandra briefed us on Boeing's discharge cleanup against the acceptance standards and the need for some future revision of those standards.
4. John Luker reviewed the status of Dayton Canyon.
5. The meeting was adjourned.
